EXPERIENCE

National Cheng Kung University

February 2018 - October 2018

Research Assistant

- Develop **web crawlers** to collect unstructured data, clean and filter data, totaling **128 billion words**.
- Train text models (**word2vec**, **seq2seq**) with a total of **200 million sentences, 1TB in size**; and generate question and answer sentences.
- Develop an **android app** to collect the patient's voice, video and text data and send it back to the server. And **integrate pre-trained deep learning models** into the server to analyze the patient's emotions. Then, **visual analysis results**, used to assist physicians in diagnosis and evaluation.

Other EXPERIMENTENCE

National Taiwan Normal University

March 2021 - August 2021

Part-time Research Assistant

- Researched the field of **zero-shot learning** advised **Prof. Mei-Chen Yeh**. We improve a zero-shot learning study published in CVPR 2020 to increase its accuracy by **5%**. Our research was published at **ICMR 2021**.

Kaohsiung Medical University, Department of Occupational Therapy
